PROFESSIONAL SUMMARY

Software Engineer specializing in frontend development, full-stack web applications, and AI-powered solutions. Experienced in building modern, scalable, and production-ready products using Next.js, React, TypeScript, Tailwind CSS, Material UI, Python, FastAPI, Prisma, and PostgreSQL. Strong track record of transforming product ideas into high-performance digital platforms with robust frontend architecture, reliable backend systems, AI integrations, and exceptional user experiences. Passionate about leveraging emerging AI technologies to create intelligent, efficient, and impactful products.

EXPERIENCE

HST Consulting PLC , *Full-Stack Developer* 2023 – Present | Onsite

Pay My Fees , *Frontend Developer* 06/2025 – 10/2025 | Remote

Intelleges , *QA Engineer* 12/2025 – 01/2026 | Remote

EDUCATION & TRAINING

10Academy, *AI and Data Engineering Training* 2024

Addis Ababa University, *Bachelor of Science in Computer Science* 2019 – 2023

CORE SKILLS

Frontend (Next.js, React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Material UI, Bootstrap) | **Backend & Full Stack** (Node.js, Python, FastAPI, Prisma ORM, PostgreSQL) | **State Management** (Redux Toolkit, Redux Saga, typed frontend architecture, reusable component systems) | **UI/UX & Design** (Figma, responsive design, usability improvements, modern interface design) | **AI & Product** (AI-assisted task generation, subtask creation, prioritization, schedule planning, AI-enabled productivity workflows)

PROFESSIONAL HIGHLIGHTS

- Built full-stack web applications with modern frontend frameworks and backend services.
- Designed and delivered responsive UI systems focused on usability, maintainability, and performance.
- Integrated authentication, CRUD workflows, typed APIs, and database-backed product features.
- Developed AI-enabled product experiences that improve planning, prioritization, and workflow execution.
- Created portfolio, business, operations, fintech, recruitment, and enterprise data platform solutions.

SELECTED PROJECTS

AI Powered Task Management System (TaskFlow AI)
Built a full-stack productivity platform using FastAPI, Next.js, and TypeScript. Delivered secure JWT authentication, task CRUD, AI task generation, subtask breakdown, backlog prioritization, and deadline-based scheduling. Improved with end-to-end API integration, typed frontend architecture, responsive UI/UX redesign, profile-based navigation, stable pagination, and scrollable workspace sections. Tech: Next.js, React, TypeScript, Tailwind CSS, Python, FastAPI, Prisma, PostgreSQL, Node.js, Ollama, Gemma

Car Spare Parts Sell System
Developed a web application for buying and selling car spare parts with support for product listing, search, purchasing flows, inventory-oriented features, and a user-friendly experience. Tech: Next.js, React, Tailwind CSS, Prisma, PostgreSQL, Node.js

HST Website
Built and delivered a business website presenting company services across audit, talent management, tax, strategy, organization, and technology solutions. Tech: Next.js, React, Tailwind CSS

HST Office Automation
Worked on an office automation platform supporting room booking, help desk workflows, and asset management to improve internal operational efficiency. Tech: Next.js, React, Material UI, Python, Django

Pay My Fees
Built a secure cross-border payment platform supporting money transfer and escrow-style flows for international payments and financial transactions. Tech: Next.js, React, Material UI, Tailwind CSS, Python, Django

Recruitment Management System
Developed a hiring workflow platform for job posting, application management, interview coordination, and candidate tracking to streamline recruitment operations. Tech: Next.js, React, Material UI, Tailwind CSS, Python, Django

Insight Bridge AI
Contributed to an AI-powered enterprise data platform that helps organizations access insights, improve decisions, and support analytics-driven business outcomes. Tech: Next.js, React, Material UI, Tailwind CSS
